

FAI Experts - IT Group

28 June 2012

Dear Experts,

We have the pleasure to inform you that, as part of the new „FAI Expert-System“, the IT Expert Groups has been established (in addition to the previously established FAI Airspace, FAI Navigation, FAI Regulation and FAI Safety Expert Groups). Members have been appointed by the FAI Executive Board, policy and goals have been defined (see enclosed) and the identification of projects is under progress. This group will start working within the next weeks.

In that context, we wish to thank you to have accepted to be a member of the FAI Expert Group IT and to congratulate you on the appointment to this position. We really appreciate the support and the time you will dedicate to the projects.

We are really looking forward to benefiting from your expertise and experience that will be helpful for the entire FAI organization and its worldwide air sports community. A separate letter containing the initial Tasking List with additional information will be forwarded to you in the first week of July 2012 and your Point of Contact (see framework enclosed) will contact you in due time.

Should you have any question, please feel free to contact Mrs. Segolene ROUILLON, Members and Services Manager (members[at]fai.org) at the FAI Head Office.

With best regards.

Jean-Marc BADAN
Secretary General
