

MALAYSIA SPORT AVIATION FEDERATION

Dear CIMA Delegate

Since last plenary in Phuket, we are working very hard to transform our pilot from recreational pilot to be sport pilot. ABG 2014 gave a big impact to our paramotor community in Malaysia. More people interested in competition now. They now understand the system, Task and how the competition runs. We are also developing our marshals in preparation to host the next AOPC in Malaysia.

Licensing still be the main issue in Malaysia. Our government still putting Paramotor under microlight that require PPL-R. Until today the NAC still issuing the Sporting license to our pilot with a improve control and monitoring.

Our event bureau is continuing organising event almost every month to make our pilot more organize, understanding and know each other. More important is in every event we will include Pilot Educational Program to update and increase knowledge of our pilot especially for safety flying.

Our government had assign fix radio frequency for our Paramotor community in commercial band to ensure communication no longer an issue. The NAC also assign every pilot a dedicated call sign to identify our pilot. We hope with this development, we can ensure all pilot are contactable at all time. We will implement new rules to get all pilots to carry 2 way Radio at all time during flight.

To date we had 94 pilots registered and holding Malaysia Paramotor License under our Federation resulted from the continuous effort promoting safety flying in Malaysia.

We are now in final preparation to organize our first FAI cat 1 competition. We will combine 1st Kembara International Paramotor Challenge (Cat 2) in the next AOPC2015. All necessary arrangement with our government had already finalized. Now we are working with our tourism department to promote AOPC/KIPC 2015.

Kembara International Paramotor Challenge (KIPC) will to be our yearly event. We will invite all pilots around the globe to compete in Malaysia and enjoying the best scenery of our long and spectacular coast line.

The cooperation from our neighbouring country also makes our paramotor activity more colourful and interesting.

Thank you

Best Regards

ROHAIZI MD HUSSIN
CIMA Delegate - Malaysia
