

European Microlight Championships 2006 New Classes

Chozas de Abajo, León, 19 – 26 August

Logger handling procedure

Loggers will be deposited and retrieved from the main office.

Depositing loggers by competitors

There will be a box labelled **LOGGER DEPOSIT** at the main office.

Pilots or other team members will deposit loggers in that box after each task. We encourage competitors to deposit loggers as soon as possible in order to speed up the scoring process.

Returning loggers to competitors

After being processed, loggers will be put in a different box for return to each team. These boxes will be **labelled with the team's name**. As soon as a box with a team name on it appears at the main office, a team member may collect the loggers in it.

Both deposit boxes and return boxes will be freely accessible by competitors but there will be a person taking care of the loggers in both cases.
