

European Microlight Championships 2006 New Classes

Chozas de Abajo, León, 19 – 26 August

Sealed device sheet

Instructions

Pilots will fill in one of this sheets for every device they need to carry sealed during a task. There will be sheets available at the main office.

Each competitor may use his own wrapping method, or the organization may provide it. In any case, a marshal will decide if the method is valid and proceed to seal the device and sign the sheet. The organization will keep this sheet while the device is sealed.

Marshals may inspect competitors' sealed equipment at any time during a task.

After the task, pilots will request their seals to be inspected and checked against the sealing records. This sheet will be given back to the pilot if the seal is not broken.

At the end of the scoring process of each task, the scoring team will review the pending sheets. Pilots who haven't got their sheets back will get a 100% penalty in the task.
