CAB - Nac Brazil

Officials

Event Director: Claudemir Antonio Carlos

Competition Director: Rogerio Martinati

Director Assistance: Ricardo Pattena

Other officials is going to be invited and presented in the next CIMA Meeting.

Officials

Competition Director: Rogerio Martinati

Rogério Martinati is among the most experienced parachutists in Brazil. He started his new career with only 14 years of age, currently 55 years old, considered one of the oldest athletes in activity in Brazil, and a reference in technical organization of events.

For several years he participated in Free Fall Formations competitions, especially in the FQL-4 modality. The Blue Sky team, which was one of its founders, maintained a hegemony for about 7 years, having represented Brazil several times in international competitions.

After its extinction, Martinati continued competing in other teams, such as the legendary "Desert Storm", the first to exceed the ten-point mark, and the Brazilian record team

"Deland Action", which represented Brazil in Turkey, in the 1st World Air Games, in 1997.

Among the titles that he achieved as a competitor, he was Brazilian Champion in more than 20 times between modalities in free fall formations of 4 people, 8 people, and speed of 10, besides Champion Latin American.

At one time, Martinati contributed decisively to the development of the sport acting as Technical Director of the Brazilian Parachute Confederation. In its management were created the current Norms of Security, Sports Code and the regulation of student training, that remains in use throughout the national territory.

His most recent works were the coordination of the latest attempts to break Brazilian and Latin American records of great formation, ranging from 40 people, 60, 65 and 103 people, between 1997 and 2015 and the sequential records of 75-way -2 points and 38-way 4 points.

One of the most important works developed by Martinati was the coordination of a group of 17 Brazilians, who along with other athletes from 39 nations participated in the attempts to break the World Record of 300 free-fall parachutists in December 99, in Thailand, and then 372-way in 2004 in the same country. In both participation, his team was consecrated World Recordist.

Martinati has its focus on safety and training of excellence teams in the sport. His way of working is distinguished from other icons of the sport precisely because of the great experience in working with high-performance teams, a fact already demonstrated over the years, and that has given him several lectures in congresses and large companies, is fundamental to the organization of great formations in free fall.

In Paramotor began his sporting activity as a Pilot in 2014. In 2017, due to his baggage as a competitor and his leadership was chosen to be Director of Competition of the 1st Model FAI Brazilian Championship, held in União da Vitória. The following year, in 2018 he was chosen to be the "Team Leader" of the Brazilian team that was represented in the Thailand World Cup, gaining experience in this modality. It was also the organizer of the World Record Breakthrough attempt for the largest number of paramotors in simultaneous flight in Araçatuba, 2018, with about 250 participating pilots. Approximately 185 pilots were flown in a restricted circuit without incident.

Officials

Director Assistance: Ricardo Pattena

Graduated in Marketing from ESPM São Paulo and post-graduate in Business Economics from PUC Campinas. He is an Army reserve officer and a partner at Skydive University.

He started in parachuting in 1971 at the age of 13 and has since performed almost 10,000 jumps. He was 20-time Brazilian champion of skydive (in 14 different years in 4-way and 8-way and 10-way in the period from 1974 to 2006) and was coach of several Brazilian champion teams.

He participated in dozens of international championships, and the first international competition was in 1974, when he represented Brazil in the Second World Parachuting Championship in Pretoria in South Africa at the age of 16.

In 1981, in the US World Cup, he established the first Latin American record in a jump with 14 points.

He was captain and world record holder of major formations twice (282-way in Thailand and 300-way in Arizona). Organizer along with Rogério Martinati from more than 20 Brazilian records, among them the diamond of 49 and 64, the great formations of 80, 82, 102, 103 and the continental record of two points of 74, as well as other more recent ones.

He took an instructor's course in 1973 in Boituva. He started the AFF course program in Brazil in 1982 with student Carlos Edo and student Luiza Raposo (wife of instructor Antonio Raposo). He was a double jump pilot and an UPT racer. He has ministered over 100 basic instructor courses, ASL instructor, AFF instructor, BBF trainer, double jump pilot, TRV sailing yacht and is wind body instructor of International Body Flight.

He was head of the CBPq Instruction and Safety Committee from 2007 to 2012, when he installed the current instruction programs of AFF, BBF, ASL and Tandem. Its greatest achievement was to implement security programs that "zeroed" the fatal accident rates in Brazil in the year 2014, never done before in any country in the world. He worked at Skydive Deland, USA as a cameraman, 4-way coach, BBF trainer and chief instructor for 6 years from 1991 to 1997, when he developed the BBF program along with Rob LaidLaw.
