Wiki Migration Project

Michael KANIA (GER)
Patrik Aussems (BEL)
Lukas BEHONEK (CZE)
Krzysztof ROMICKI (POL)

Goodbye Wiki – Hello NextCloud

- After many years of using Wiki, it is time migrate to a modern tool like NextCloud.
- Next Cloud is comparable to well known apps like onedrive, google drive or icloud drive.
- NextCloud isn't actually a cloud service, because it is running on the FAI Server farm.
- NextCloud is more file based than wiki, this makes the use very simple.
- Office tools like word, excel and powerpoint are available online.
- In addition tools like calendar, contacts, notes and some more are also available.
- FAI-IT is in charge for maintenance, usermanagement, backup etc.
- The use of NextCloud is easy to learn and up-to-date.

Goodbye Wiki – Hello NextCloud

CIMA - The international Microlight and Paramotor Commission of the FAI

cima_logo_2.jpg

CIMA is the International Microlight and Paramotor Commission of the FAI - the World Airsports Federation

CIMA = Commission Internationale de Micro-Aviation.

Name ▾

- CIMA Championships
- CIMA Competitions
- CIMA Flight Recorders
- CIMA History (WIP, MK)
- CIMA IT WG
- CIMA Microlight Committee
- CIMA Paramotor Committee

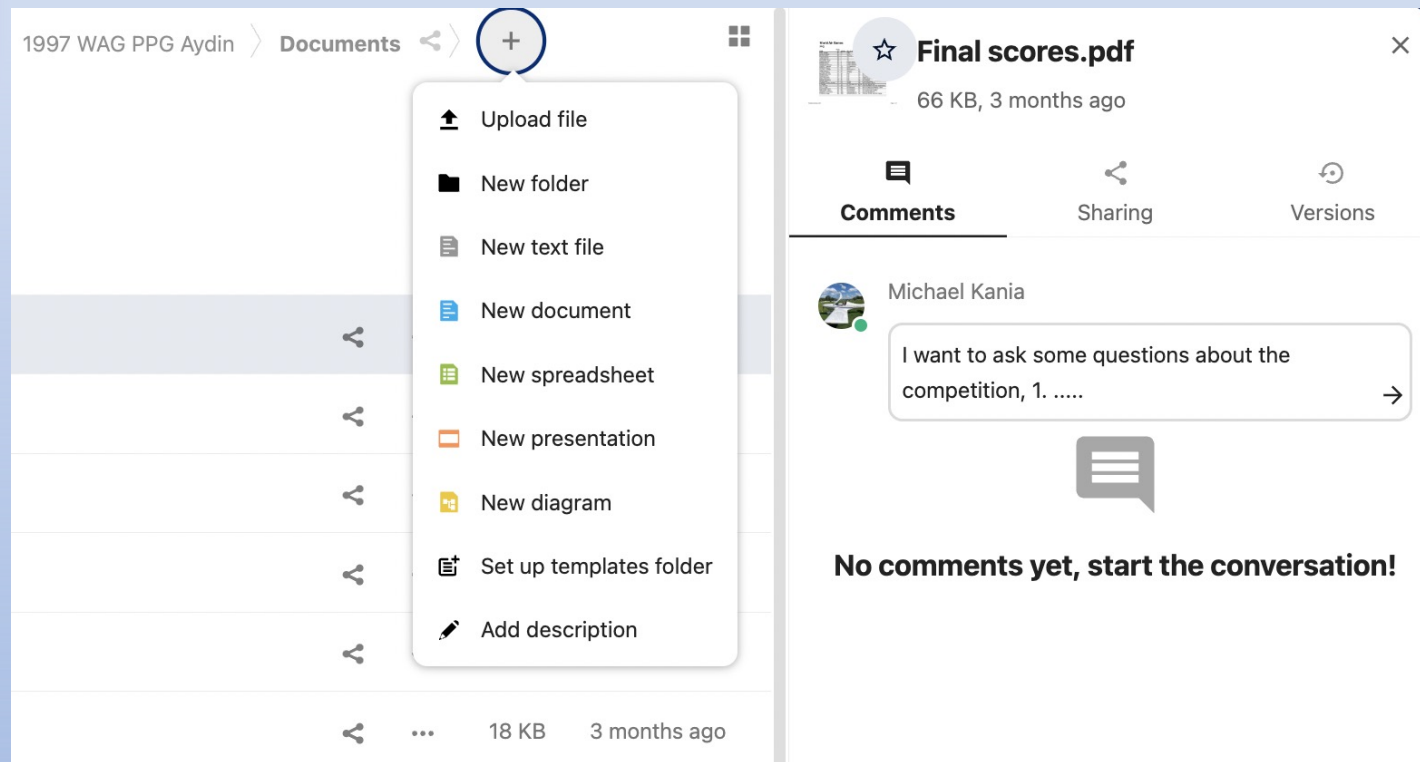

As registered user you will have access to folder, which are named as "spaces" in the old Wiki.

Any folder contains a header area which is used for general information of the folder and his content as well as links to documents or websites.

Most of the information which are up to now displayed on a Wiki webpage you will find now as a .PDF file within the folder or subfolder.

This is important especially for information and documents which have to be protected against unintentional or intentional changes.

Goodbye Wiki – Hello NextCloud

As registered user you are allowed to create, upload and download files as well as comment files.

Well known Office tools are available online. The work on documents is independent from your own device.

Goodbye Wiki – Hello NextCloud

There are some more useful tools and apps available, a tutorial will follow.

The data transfer from Wiki to NextCloud is ongoing.

More information and details will be presented during the next plenary 2024.
