

2011 JAPAN report

A big disaster appeared on Japan in this year.

Many people lose a life, and hard, too, life now is being done.

But, thank you for it was supported from many countries.

I hope Japan watched by the warm heart from this as well.

Thank you.

Japanese condition.

The number of registration of the Japanese paramotor is almost 1000 people.

The fatal accident was 4.

The problem of this year is that a paramotor began to influence an aircraft.

An ignorant paramotor pilot is causing a trouble.

And, the person who flies with the paramotor as a work related to the air photo business and the mass communication is causing a trouble, too.

I want to hear the conditions of each country about the paramotor flight for the business.

Thank you.

Ryoya garashi
